

Atlantic City Electric Is Ready For Summer

With summer just around the corner, Atlantic City Electric is hard at work, prepping our systems and testing our processes and procedures, all part of our efforts to provide safe and reliable service for our 556,000 customers all summer long.

Atlantic City Electric is committed to providing our customers with a modern, reliable and resilient energy grid, all to provide the service our customers have come to expect. To support this effort, over the last five years we have spent hundreds of millions of dollars modernizing the local energy grid and helping reinforce our system against extreme weather events.

Because of these efforts, our customers are continuing to experience improvements in the reliability of their energy service. Over the past five years, money spent in the local energy grid has reduced the frequency of power outages by 22 percent for Atlantic City Electric customers. When outages did occur, customers were restored 17 percent faster, on average.

While we work hard to prepare our system and employees for the summer, being prepared is a responsibility everyone should take seriously. Please encourage residents to visit atlanticcityelectric.com/mobileapp to download our mobile app, which has many resources to keep customers informed when and if an outage does occur.
